Regular papers

Role of the glycosyl-phosphatidylinositol anchor in the intracellular transport of a transmembrane protein in Madin-Darby canine kidney cells
F. Cailler, S. Howell and P. Crine (Canada) 1

An investigation into the lipid interactions of peptides corresponding to the C-terminal anchoring domains of *Escherichia coli* penicillin-binding proteins 4, 5 and 6
F. Harris, R. Demel, B. de Kruijff and D.A. Phoenix (The Netherlands, UK) 10

Doxorubicin physical state in solution and inside liposomes loaded via a pH gradient
X. Li, D.J. Hirsh, D. Cabral-Lilly, A. Zirkel, S.M. Gruner, A.S. Janoff and W.R. Perkins (USA) 23

Temperature dependence of monovalent cation fluxes in isolated rat hearts: a magnetic resonance study
M.L.H. Gruwel, B. Kuzio, B. Xiang, R. Deslauriers and V.V. Kupriyanov (Canada) 41

Riboflavin transport by rabbit renal basolateral membrane vesicles
N. Yanagawa, O.D. Jo and H.M. Said (USA) 56

Phospholipid acyl chain rotational dynamics are independent of headgroup structure in unilamellar vesicles containing binary mixtures of dioleoyl-phosphatidylcholine and dioleoyl-phosphatidylethanolamine
G.W. Hunter and T.C. Squier (USA) 63

Assembly of the Kdp complex, the multi-subunit K^+-transport ATPase of *Escherichia coli*
M. Gaßel, A. Siebers, W. Epstein and K. Altendorf (Germany, USA) 77

Human proteolipid protein (PLP) mediates winding and adhesion of phospholipid membranes but prevents their fusion
N. Palaniyar, J.L. Semotok, D.D. Wood, M.A. Moscarello and G. Harauz (Canada) 85

Interactions of a vesicular stomatitis virus G protein fragment with phosphatidylserine: NMR and fluorescence studies
M.P. Hall, K.K. Burson and W.H. Huestis (USA) 101

The turgor sensor KdpD of *Escherichia coli* is a homodimer
R. Heermann, K. Altendorf and K. Jung (Germany) 114

Rotational dynamics of spin-labelled surfactant-associated proteins SP-B and SP-C in dipalmitoylphosphatidylcholine and dipalmitoylphosphatidylglycerol bilayers
A. Cruz, D. Marsh and J. Pérez-Gil (Germany, Spain) 125

Interaction of the neuronal marker dye FM1-43 with lipid membranes
U. Schote and J. Seelig (Switzerland) 135

Mechanical aspects of membrane thermodynamics. Estimation of the mechanical properties of lipid membranes close to the chain melting transition from calorimetry
T. Heimburg (Germany) 147

Amphiphilic and hydrophilic forms of acetylcholinesterase from sheep platelets
M. Rocío Marcos, J. Sánchez-Yagüe, A. Hernández-Hernández and M. Llanillo (Spain) 163

The lipid/protein interface as a target site for general anesthetics: a multiple-site kinetic analysis of synaptosomal Ca^{2+}-ATPase
D. Pflugmacher and H. Sandermann Jr. (Germany) 174

Comparison between the dynamics of lipid/gramicidin A systems in the lamellar and hexagonal phases: a solid-state ^{13}C NMR study
M. Bouchard, C. Le Guernevé and M. Auger (Canada) 181

Effect of cholesteryl hemisuccinate on the interfacial properties of phosphatidylcholine bilayers
J.B. Massey (USA) 193

The phospholipid-deficient *pho1* mutant of *Arabidopsis thaliana* is affected in the organization, but not in the light acclimation, of the thylakoid membrane
H. Härtel, B. Essigmann, H. Lokstein, S. Hoffmann-Benning, M. Peters-Kottig and C. Benning (Germany, USA) 205

Destabilization of cationic lipid vesicles by an anionic hydrophobically modified poly(*N*-isopropylacrylamide) copolymer: a solid-state ^{31}P NMR and ^{2}H NMR study
C.M. Franzin, P.M. Macdonald, A. Polozova and F.M. Winnik (Canada) 219
